Purchase by the Union Palace Car Company of Plants and Franchises of the Mann Bondoir and Woodruff Car Companies. The Union Palace Car Company, which was recently formed with a capital of \$3,000,000. has bought the plants, rights, franchises, and patents of the Mann Boudoir and of the Woodruff Drawing-room Car Companies. The organization of the new company was perfected yesterday by the election of the following Board of Directors: Edward D. Adams of Winslow, Lanier & Co.: John H. Inman, President of the Richmond Terminal Company James A. Garland of the First National Bank. John Greenough of Poor & Greenough, Daniel C. Corbin, a brother of Austin Corbin, and the President of the Woodruff Company; John G. koore of Moore & Schley, Job H. Jackson of the Jackson-Sharpe Company, Wilmington, Del., and Thomas C. Purdy, formerly President of the Mann Company. Mr. Purdy was elected President and Mr. Corbin Vice-President. It is the intention of the new company to put into service the finest sleeping and parior cars that have ever been made. The two systems of service it has acquired cover about 13,500 miles of road, including the Philadelphia and Beading, the Jersey Central the Long Island, the Richmond and Danville system, the "Stickney" system between St. Paul and Kansas City, and a number of smaller lines. The contracts have been made with the Jackson-Sharpe Company and Har-lan and Hoilingsworth to build a number of new cars for the company, and arrangements are being made for the extension of its system. The general passenger agents of the trunk lines resterday met again to consider immigrant difficulties. The two outstanding lines

ines yesterday met again to consider himmer grant difficulties. The two outstanding lines seem to be content with the traffic they are getting and they show no signs of williugness to come around. They were not represented a yesterday's meeting at Commissioner Fink's office, and all that was done by the others was to talk over new schemes of arbitration in the hope of reaching an understanding before orders are issued on next year's business.

Arrangements were made with the New York State committees of the several parties by which any one living out of town who desires to vote can go and return for 1% fare.

In a week or two twenty new express cars will be put on to the Erie road for the use of wells. Fargo & Co.

A large gang of men is at work at Richmond Hill building the new machine shops of the Long Island road. Being at the junction of the Montauk and Atlantic divisions, they will be more accessible than at any other point in the system. Their removal from Long Island City will make room for additional switching tracks.

same train for thirty-six years successively. He started forty-three years ago on the Camden and Amboy road and spent several years on the Erie.

William H. Powell is favorably known among the freight engineers of the New York Central road. He was once Master Mechanic at West Albany of the middle division of the Central, and again of the Hensselear and Saratoga road. It is more than twenty-five years since he started on the Central. He came back the last time as engineer in 1881, and he now runs a stock train at twenty-five miles an hour with engine 8, which has automatic air appliances, and is one of the best drivers on the road.

Augustus Johnson, commonly called "Shoemaker," has been with the Central as an engineer since 1877, coming from the Vermont Central. He is another fast freight runner, and has an engine like Powell's, which is soon to have the automatic air appliances. He will alternate with Jumes Kelly in running engine 14. Kelly ran for some time on the Morris and Essex road, and he has a reputation for annihilating time and distance.

Some time ago the lowa Railroad Commissioners, at the request of Gov. Larrabee, asked the different railroads to furnish a statement as to the present value of their property. About half of the roads have replied "Unknown" and others say it is a matter of guess work. The answer of the Rock Island road, received to-day, politely declines to turnish the Information, and gives some of the reasons why it is impossible. It reminds the Commissioners that a year ago they had no idea why the Legislature ever asked them to collect this information, and gives some of the Prosens why it is impossible. It reminds the Commissioners that a year ago they had no idea why the Legislature ever asked them to collect this information, and then it reminds them that in their public examinations some weeks ago they admitted that the present asked them to collect this information, and then it reminds them that in their public examinations some weeks ago they admitted that the present and th

The Movement to Induce French Canadians

OTTAWA, Oct. 30 .- The Government of the many of the 500,000 French Canadians who from year to year have left that province to settle in the United States to return to the land of their birth. With this object in view. they have despatched two Commissioners, one to work among their compatriots in the New England States and the other through New York State. The total population of Quebec, according to the last census, was 1.359.07, of whom 1.073.820 were French Canadians.

MCommissioner Proulx is now at work in the manufacturing centres of Massachusetts, where he reports he is meeting with good encouragement. The French in Canada, although they profess allegiance to the British Crown, have never forgotten the conquest of 1759, when they were compelled to lay down their arms and become subjects of Great Britain. The nationalist feeling was never stronger among them than at present, and here lies the groundwork of a conflict, which, sooner or later, will be sprung upon the people of the Dominion, as to who shall dominate, French or English. they have despatched two Commissioners, one

He Tried to Steal His Own Child. Three-year-old Ada Finer was playing on

the sidewalk in front of her mother's home, at 8 Pitt street, yesterday, when a man seized her and ran down the street. The child's mother ran out of the house crying. "Stop him! Stop him!" The man was her husband. They were both arrested. In the Essex Market Police Court the wile told Justice Duffy that her husband had abandoned her six months ago. The husband alleged that she had left him. Justice Duffy discharged the wile and fined the husband \$10. The child was returned to the mother.

M'FICKER'S A GOOD ONE. He and the Second Mate Licked a Fore-

Capt. James H. McLeod of the British morning consisting of thirteen Jamaica ne groes. He was jubliant over this because he was in a hurry to get started on his way to Antwerp. The Canute was anchored off Robbins Reef all ready loaded for her voyage with a cargo of off. Yesterday morning Chief Mate William H.

McVicker ordered the boatswain to tell the crew to turn to and get up the anchor. The boatswain gave the order, but the crew laughed at him and refused to do any work whatever. On hearing this McVicker remarked that he'd be gormed if they wouldn't work, and he went into the forecastle himself to see about it.

He found the thirteen big Jamaicans still laughing and he cussed them for "niegers." At this Lewis Archer, who is a mammeth lellow, let out with his left and took the mate under the eye. This was a signal for eight of the others to join the massacre of McVicker. He called for help, and the second mate ran to his assistance. These two practically knocked the nine big negroes out. The second mate was pretty hadly used up, but the negroes were worse. As seon as they were intimidated and it was saire to leave the field, a signal of distress was hoisted, which was answered by the police boat Patrol about 1 o'clock.

Capt. Gastlin was astonished when he saw how McVicker had used up the nine gigantic negroes with no better weapon than his fists. "He must be a good one," said the Captain. "for he was perfectly fresh when I got there, although one of his eyes was closed up. The negroes were awfully battered."

The nutineers were put aboard the tug C. R. Stone in charge of Detective Wood and a section of men and taken to the city, where they were arraigned before the lightish Consul, who discharged them. Capt. McLeod will ship a new crew as soon as tossible, and expects to sail for Antwern this morning. He was unwilling to use his time in pressing a complaint against the mutineers. marked that he'd be gormed if they wouldn't work, and he went into the forecastle himself

The course of New England was confirmatory

of the view expressed in this column this

morning, namely, that yesterday's movement was with the view of acquiring stock for election purposes. There were no developments re-

to depress it, and later an attempt to recover

the stock that had been sold. Philadelphia

took an active interest on the long side of Reading and some one furnished very effective support to the Gouid stocks. Alissouri Pacific on comparatively light transactions closed with an exceptional net gain of over 1 7 cent. This movement was attended by an absurd rumor that Mr. Gouid had obtained control of the Atchison road. A substantial reason for an advance in the price of Missouri Pacific may be furnished when Mr. Gouid had the Atchison people agree to restore rates to a profitable basis. Such an agreement is, we think, liable to be made any day. Both companies are sadly in need of better earnings, and their systems are so large and unwieldly that a war of extirpation cannot but be fatal to both. Besides the present fashion is in the direction of better rates than have prevailed, beside either party to the contest
